 - Ca 2/3's of growth from acquisitions
- 85% of sales are to the Nordic countries

- EBITDA at SEK 515 m in 2021
- Profitability lower in 2017-19 due to input prices on material and lower result initially from acquisitions
- Higher profitability in 2020-21 due to positiv impact from the pandemic, well managed cost inflation and operational improvements

- RoCE at the end of 2021 at 16.6%, well above the Group threshold of 13.0%
- Capital employed has increased due to acquisitions made and investment in inventory during the pandemic to secure capability to deliver.

NWG and the RU vs UA war

- We have no subsidiaries or employees in either country
- Our sales exposure to the area was limited (0.4% of total sales) in 2021 and we have cut exports at this time
- Input material supplies relying on Russian raw material discontinued
- We don't expect any impact on our supply chain and capability to deliver to our customers at this time.
- We expect an acceleration of input cost inflation which in the medium term might lead to softer demand for construction.
- Supporting refugees from Ukraine by donations from employees and subsidiaries

Financial targets

Sales growth

NWG's goal is to exceed the growth in the Group's current markets through organic growth.

In addition, the Group expects to grow through selective acquisitions.

Profitability

NWG's goal is to generate a return on capital employed (ROCE) exceeding 13 percent for the financial year

Capital structure

Net interest-bearing debt in relation to EBITDA shall not exceed 3 times at year-end

Dividend policy

NWG' aims to distribute an annual dividend of more that 50 percent of its net profit. The pay out decision will be based on the Group's financial position, investment needs, liquidity position as well as general economic and business conditions.

Q4 2021

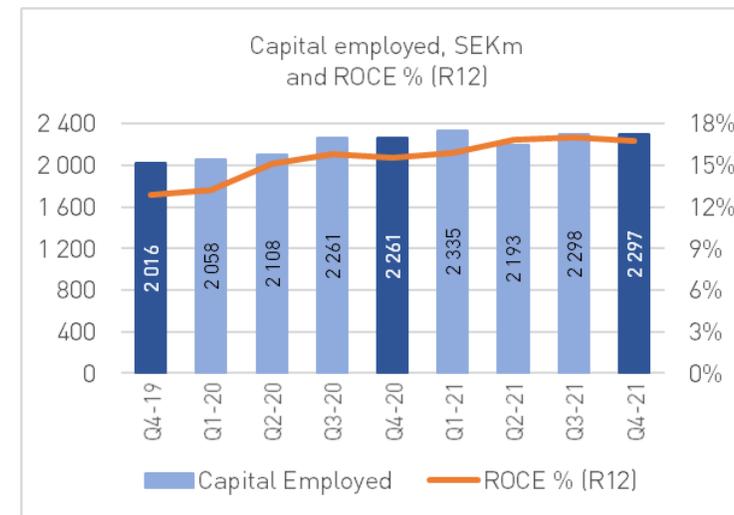

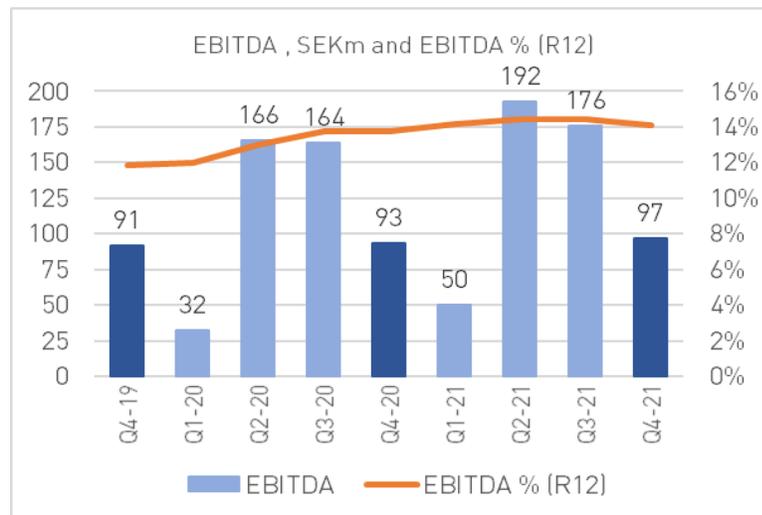

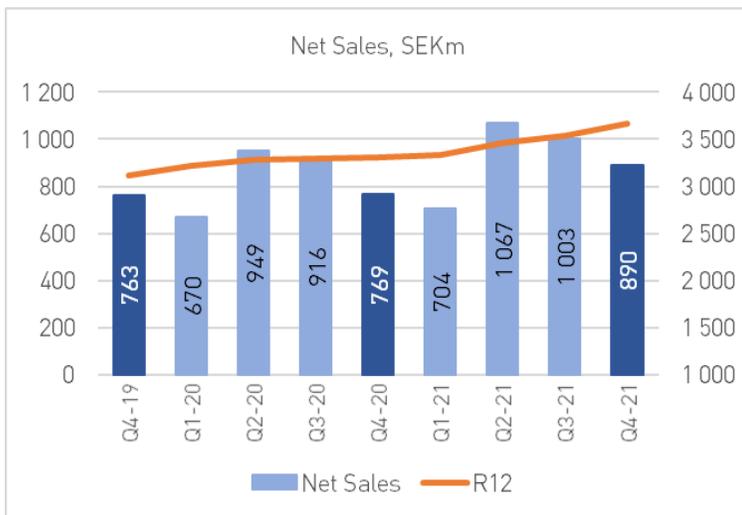

NORDIC 
WATERPROOFING

Q4 Highlights and comments

- **Demand** remains strong
 - On a stable level for the **roofing business** on all markets
 - **Installation Services** decreased due to delays on job sites due to component shortages from other suppliers, outlook remains positive
 - In the medium term dramatic cost inflation might weigh on demand
- Input cost inflation has had an effect on both business segments.
 - In Products & Solutions we have absorbed these through a series of sales price increases.

- The **bitumen-based** waterproofing business as well as **SealEco** showed double-digit growth.
- **Prefabricated elements** had slightly lower sales than last year due to the Norwegian entity. Strong order books on all markets.
